

AURION HEALTH INTELLIGENCE LIMITED

**Transforming Healthcare Through Artificial Intelligence
and Data Intelligence**

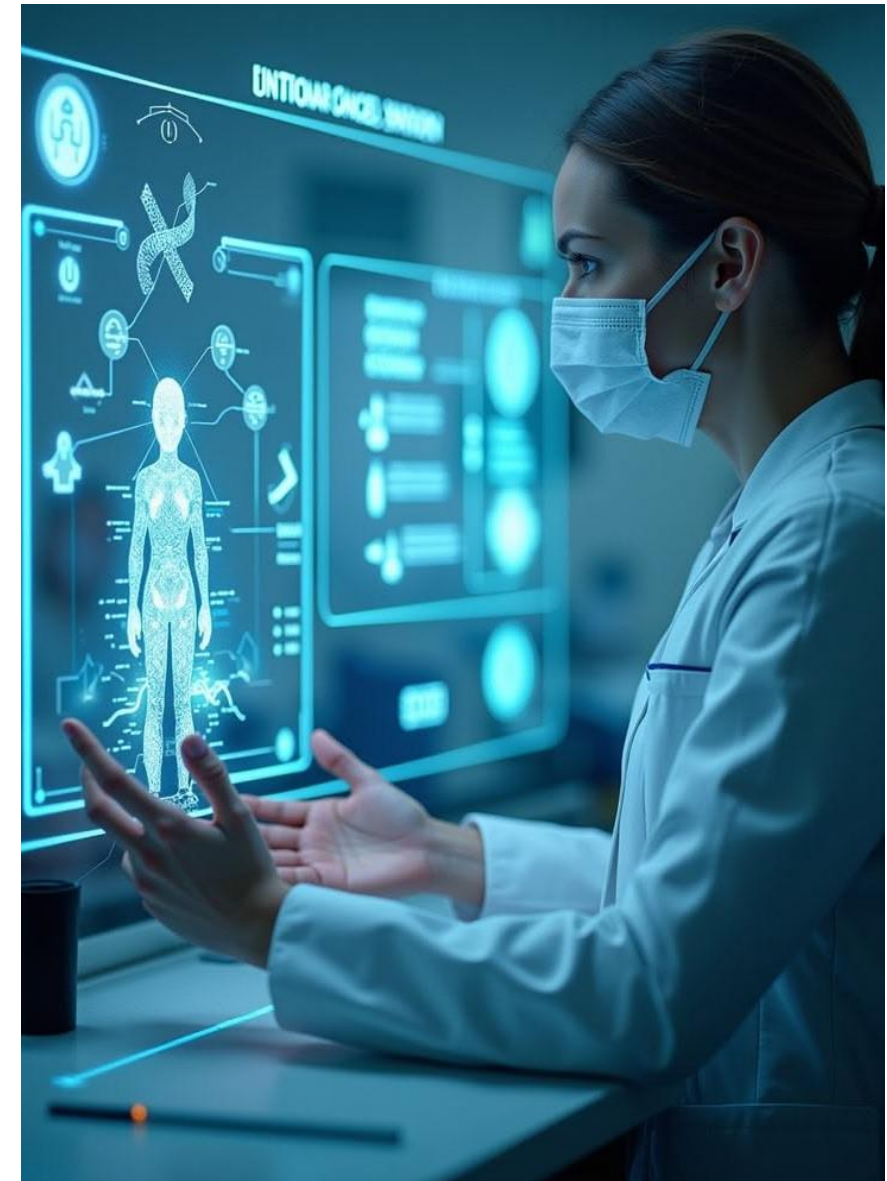

Executive Summary

Aurion Health Intelligence Limited is an emerging healthcare intelligence and Artificial Intelligence startup consultancy founded to support the transformation of healthcare systems through data-driven innovation, smart technologies, and capacity building.

The company is being developed as a collaborative initiative by Sabo Mustapha M and a team of course mates with interests in Artificial Intelligence, data analytics, digital health, public health innovation, and technology-driven problem solving.

Aurion Health Intelligence Limited aims to help healthcare organizations, government agencies, hospitals, development partners, health-tech startups, and research institutions use Artificial Intelligence and data intelligence to improve decision-making, strengthen health systems, optimize healthcare operations, and support better health outcomes across Nigeria and Africa.

As a startup, Aurion is focused on building strong foundations, developing practical service offerings, creating strategic partnerships, and designing future AI-powered healthcare solutions that can address real-world healthcare challenges.

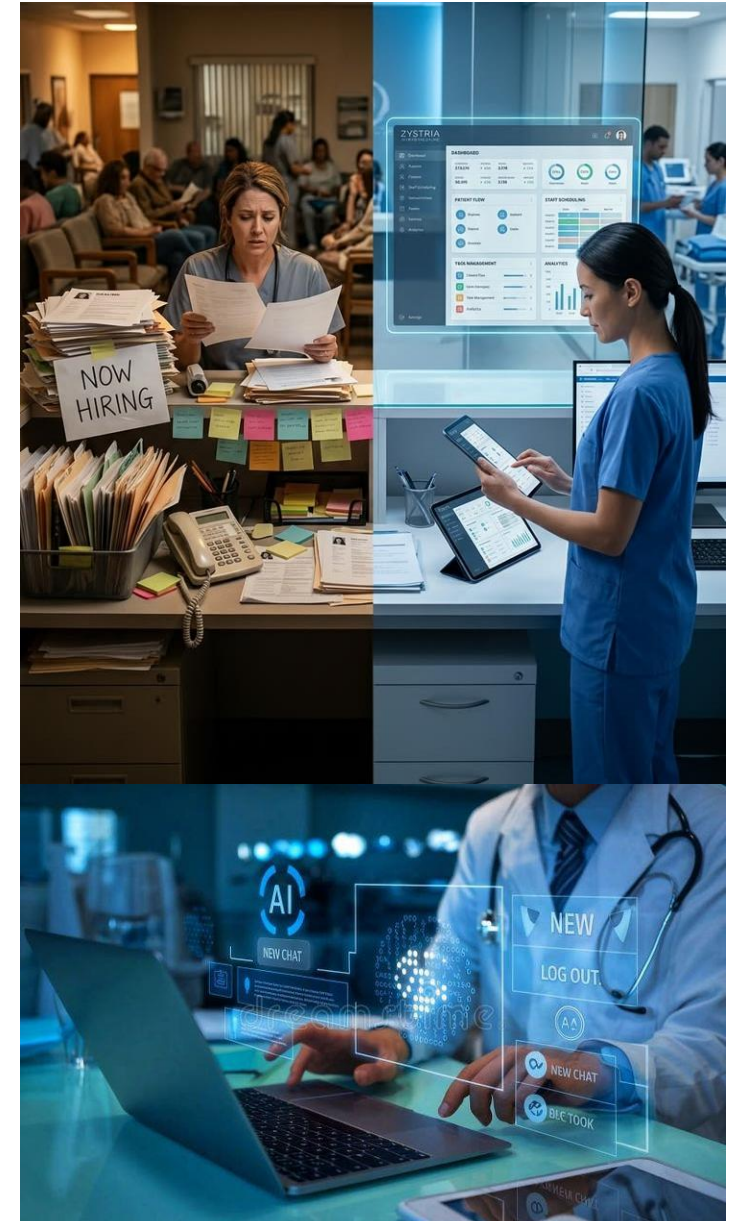

The Problem We Aim to Solve

Healthcare systems across Nigeria and Africa face major challenges that limit efficiency, planning, and quality of care.

Key problems include:

- ✓ Fragmented healthcare data systems
- ✓ Manual and delayed reporting processes
- ✓ Limited use of AI and predictive analytics in healthcare
- ✓ Weak disease surveillance and early-warning systems
- ✓ Poor visibility in hospital performance and resource use
- ✓ Limited digital health and AI capacity among healthcare teams
- ✓ Gaps in health data governance, privacy, and responsible AI adoption
- ✓ Limited local AI-health expertise designed for African healthcare realities

Aurion Health Intelligence Limited exists to help address these gaps through consulting, research, innovation, training, and future AI-powered healthcare solutions.

The Opportunity

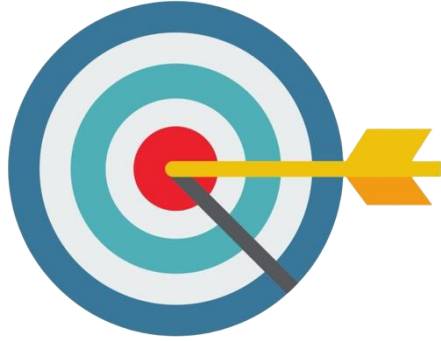

Healthcare systems are increasingly recognizing the need for smarter, faster, and more data-driven decision-making.

Artificial Intelligence, data analytics, health informatics, and digital health tools can help healthcare institutions improve public health monitoring, hospital operations, patient engagement, disease surveillance, and strategic planning.

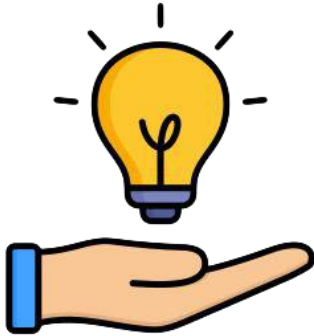

Aurion Health Intelligence Limited sees an opportunity to build a startup consultancy that combines AI knowledge, healthcare intelligence, student innovation, research, and practical problem-solving to support healthcare transformation across Nigeria and Africa.

Our opportunity is to become a trusted early-stage healthcare intelligence partner for institutions seeking affordable, practical, ethical, and locally relevant AI and data solutions.

Mission

To empower healthcare organizations and public health institutions with AI-driven knowledge, data intelligence, and innovative solutions that improve decision-making, operational efficiency, and healthcare outcomes.

Vision

To become a leading student-led African healthcare intelligence initiative, recognized for advancing AI-driven health innovation, public health intelligence, and data-powered healthcare transformation.

Purpose

To become a leading student-led African healthcare intelligence initiative, recognized for advancing AI driven health innovation, public health intelligence, and data-powered healthcare transformation.

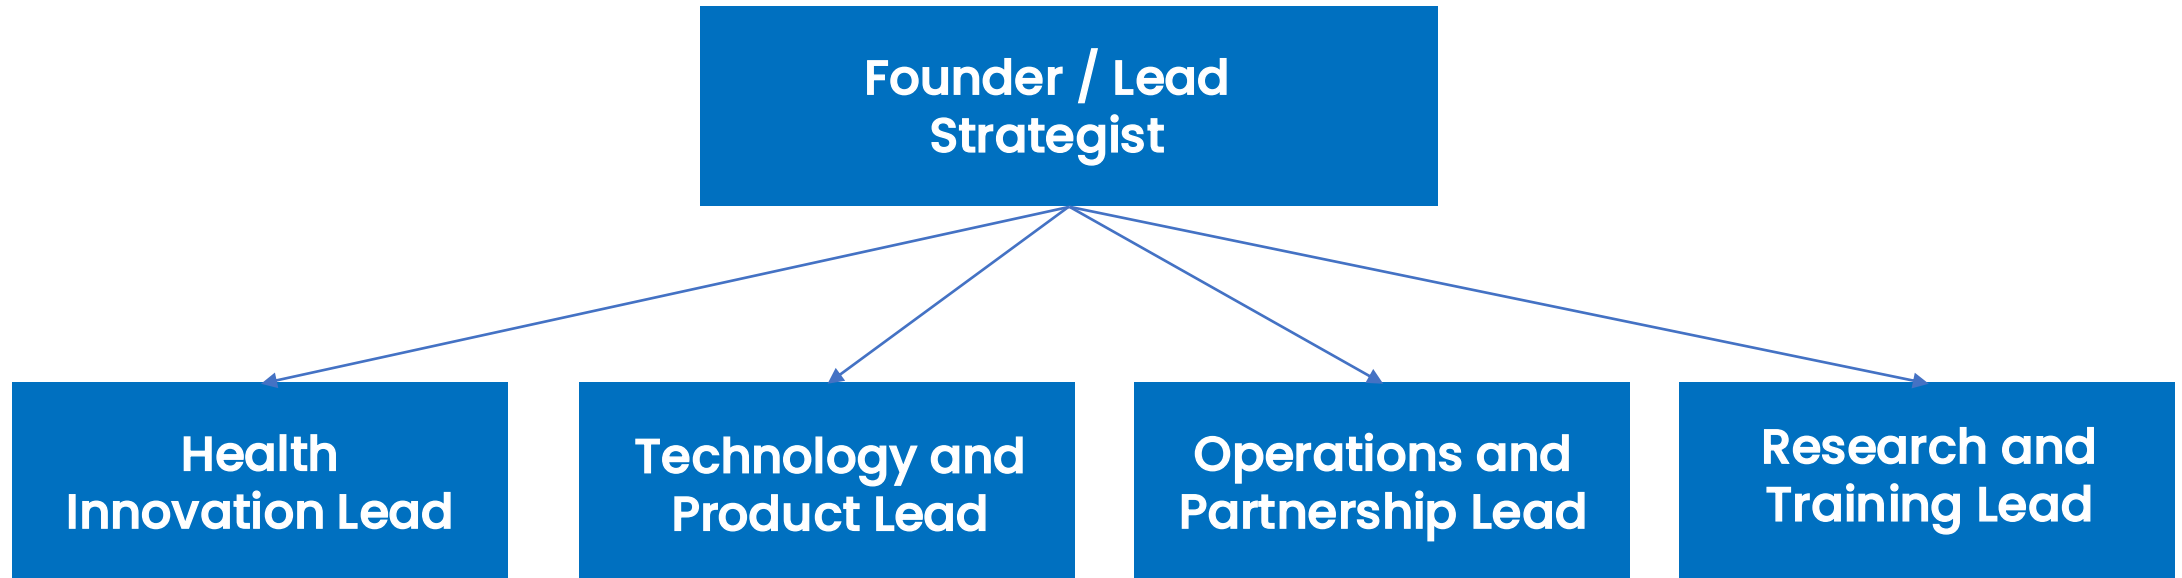

Founding Team and Collaboration Model

Aurion Health Intelligence Limited is being developed as a collaborative startup initiative led by Mustapha Sabo alongside a team of course mates and collaborators with shared interests in Artificial Intelligence, healthcare innovation, data analytics, public health, and digital transformation.

The company is not built around one person alone. It is designed as a collaborative platform where team members can contribute different skills, including:

- ✓ AI and machine learning
- ✓ Data analytics
- ✓ Healthcare research
- ✓ Public health knowledge
- ✓ Software development
- ✓ Business strategy
- ✓ Digital transformation
- ✓ Project management
- ✓ Design and communication
- ✓ Training and capacity building

Founding Team Structure

Planned Core Services:

As a startup consultancy, Aurion Health Intelligence Limited plans to develop and offer the following services:

Healthcare AI Strategy and Advisory

Aurion will support healthcare organizations in understanding how to adopt Artificial Intelligence responsibly and practically.

Planned services include:

- ✓ AI readiness assessment
- ✓ Healthcare AI strategy development
- ✓ Digital health transformation planning
- ✓ AI adoption roadmaps
- ✓ Responsible AI advisory
- ✓ Health technology implementation planning

Health Data Analytics and Business Intelligence

Aurion will help organizations transform healthcare data into useful insights for planning, reporting, and decision-making.

Planned services include:

- ✓ Healthcare data analysis
- ✓ Dashboard design
- ✓ Data visualization
- ✓ Predictive analytics
- ✓ Population health analytics
- ✓ Reporting automation
- ✓ Performance monitoring

Public Health Intelligence and Disease Surveillance

Aurion plans to support public health institutions with analytics and intelligence tools for disease monitoring and response.

Planned services include:

- ✓ Disease surveillance analytics
- ✓ Outbreak trend monitoring
- ✓ Early-warning dashboards
- ✓ Public health data analysis
- ✓ Geographic health insights
- ✓ Population risk analysis

Hospital Operations Optimization

Aurion will support hospitals and clinics with data-driven tools to improve operational efficiency.

Planned services include:

- ✓ Patient flow analysis
- ✓ Resource allocation insights
- ✓ Bed occupancy monitoring
- ✓ Inventory analytics
- ✓ Waiting time analysis

Digital Health and Patient Engagement

Aurion plans to explore AI-enabled tools that improve patient access, communication, and digital engagement.

Planned services include:

- ✓ Healthcare chatbots
- ✓ Patient support tools
- ✓ Digital triage concepts
- ✓ Remote monitoring concepts

Training and Capacity Building

Aurion will provide training programs to help healthcare professionals, students, policymakers, and institutions understand AI and data intelligence.

Planned services include:

- ✓ AI literacy training
- ✓ Health data analytics workshops
- ✓ Digital health training
- ✓ Responsible AI training
- ✓ Public health intelligence training

Research and Innovation

Aurion will support research, innovation, and collaboration in AI for healthcare.

Planned services include:

- ✓ Applied AI research
- ✓ Healthcare innovation projects
- ✓ Digital health research
- ✓ Academic collaboration
- ✓ Whitepapers and thought leadership

Aurion Insight™

A planned healthcare intelligence dashboard designed to help organizations visualize data, monitor performance, and generate actionable insights.

Aurion Predict™

A planned predictive analytics platform designed to help organizations forecast risks, anticipate demand, and support proactive healthcare planning.

Planned Solutions and Product Concepts:

Aurion Health Intelligence Limited plans to develop future healthcare intelligence tools and product concepts that can support healthcare organizations.

Aurion Sentinel™

A planned disease surveillance and monitoring platform designed to support public health intelligence, outbreak monitoring, and early-warning systems.

Aurion Care™

A planned patient engagement and support platform designed to support AI-enabled communication, patient education, and digital health assistance.

Target Clients and Partners

Aurion Health Intelligence Limited aims to serve and collaborate with:

- ✓ Federal Ministry of Health
- ✓ State Ministries of Health
- ✓ National Primary Health Care Development Agency
- ✓ Nigeria Centre for Disease Control and Prevention
- ✓ Teaching Hospitals
- ✓ Federal Medical Centres
- ✓ State Primary Health Care Boards
- ✓ Public health agencies
- ✓ Private hospitals and clinics
- ✓ Health-tech startups
- ✓ Universities and research institutions
- ✓ NGOs and donor-funded health programs
- ✓ International development partners
- ✓ Health insurance and HMO organizations
- ✓ Pharmaceutical and life sciences organizations

Aurion is especially interested in partnerships with organizations working to strengthen healthcare systems, improve public health outcomes, and promote responsible use of AI in healthcare.

Commitment

Startup Development Plan

Aurion Health Intelligence Limited will grow through clear stages.

Phase 1: Foundation

- ✓ Finalize company identity and brand
- ✓ Build the founding team
- ✓ Develop the company website
- ✓ Create company profile and pitch materials
- ✓ Define service offerings
- ✓ Build early partnerships
- ✓ Identify pilot project opportunities

Phase 2: Validation

- ✓ Conduct research into healthcare AI needs
- ✓ Develop sample dashboards and prototypes
- ✓ Engage hospitals, public health agencies, and startups
- ✓ Run workshops or training sessions
- ✓ Build case study concepts
- ✓ Test service models with early partners

Phase 3: Pilot Project

- ✓ Launch small pilot projects with healthcare organizations
- ✓ Develop proof-of-concept solutions
- ✓ Create public health intelligence demos
- ✓ Build Aurion Insight™ prototype
- ✓ Document project outcomes and lessons learned

Phase 4: Growth

- ✓ Expand client base
- ✓ Formalize partnerships
- ✓ Build a wider technical and advisory team
- ✓ Develop training programs
- ✓ Launch product prototypes
- ✓ Seek grants, investors, and institutional partnerships

Phase 5: Scale

- ✓ Expand across Nigeria
- ✓ Support regional healthcare intelligence projects
- ✓ Build scalable AI-health solutions
- ✓ Develop product platforms
- ✓ Grow into a recognized African healthcare intelligence company

Governance Ethics and Data Protection

Aurion Health Intelligence Limited recognizes that healthcare data is sensitive and must be handled responsibly.

As part of its development, Aurion will promote ethical AI, responsible data use, privacy awareness, and transparent technology adoption.

- ✓ Data privacy
- ✓ Transparency
- ✓ Accountability
- ✓ Human-centered AI
- ✓ Fairness and bias awareness
- ✓ Security of health information
- ✓ Responsible innovation
- ✓ Ethical use of AI in healthcare

Aurion's advisory approach will be informed by recognized responsible AI and data governance principles, including NIST AI Risk Management Framework principles, ISO/IEC 42001 AI management system principles, Nigeria Data Protection Act requirements, and global best practices in responsible digital health.

Partnership Opportunities

Aurion Health Intelligence Limited welcomes collaboration with organizations and individuals interested in AI for healthcare, digital health transformation, public health intelligence, and capacity building.

Potential partnership areas include:

- ✓ AI and healthcare research
- ✓ Healthcare dashboard prototypes
- ✓ Public health data projects
- ✓ Training and workshops
- ✓ Disease surveillance concepts
- ✓ Digital health innovation
- ✓ Student-led healthcare technology projects
- ✓ Pilot programs with healthcare institutions
- ✓ NGO and public health program support
- ✓ Startup and university collaborations

Conclusion:

Aurion Health Intelligence Limited is being built with a clear vision: to help healthcare systems make better decisions through Artificial Intelligence, data intelligence, and digital innovation.

As a startup, Aurion is still growing, learning, and building. But its mission is clear, to support healthcare organizations with the intelligence, tools, training, and innovation needed to improve health outcomes and strengthen healthcare systems.

Aurion represents a new generation of African healthcare innovation: collaborative, data-driven, ethical, practical, and impact-focused.

From Data to Decisions. From Insights to Impact.
